Bonjour

```
"SELECT Facture.IDFAC, Facture.DateFacture, Facture.IDMOD_REG, Facture.ECHEANCE,  
Li_fac.Q_FAC, Li_fac.PrixTTC FROM Facture, Li_Fac where Facture.IDFAC=Li_fac.IDFAC and  
&#039;" +d1+"&#039; <=Facture.DateFacture and &#039;" +d2+"&#039; >=Facture.ECHEANCE")
```

Il aurait été intéressant d'avoir le message en cas d'erreur.

Mickael
