J'aimerais bien de les connaitre un peu plus ...

> Of course this kind of solution will open a closed door,
> with all risks with it.

Risques ? Bon , il y en a deja beaucoup des db's avec
ce 'risques' (mdb, dbf, db, dataflex, xxSQLxxxx, etc
etc). On a eu des clients qui ont edite les MMO avec
notepad, c'est tellement plus risque
...

Greetings,
Peter
