Bonjour,

Vous pouvez essayer cela :

```
SCIP:cBufferSize = 0 SCIP:irDriveRegs:bFeaturesReg = SMART_ENABLE_SMART_OPERATIONS
SCIP:irDriveRegs:bSectorCountReg = 1 SCIP:irDriveRegs:bSectorNumberReg = 1
SCIP:irDriveRegs:bCylLowReg = SMART_CYL_LOW SCIP:irDriveRegs:bCylHighReg =
SMART_CYL_HI //Compute the drive number. SCIP:irDriveRegs:bDriveHeadReg = &HA0 // Or
(DriveNum And 1) * 16 SCIP:irDriveRegs:bCommandReg = IDE_EXECUTE_SMART_FUNCTION
SCIP:bDriveNumber = DriveNum
```

Bon dév.,

Totof
