salut

merci de ce dbut de réponse.

faute de mieux, j'ai gratté un peu et j'ai trouvé un code vb.

///

Option Explicit

```
Private Declare Function SendMessage Lib "user32" Alias "SendMessageA" _  
(ByVal hwnd As Long, ByVal wParam As Long, ByVal lParam As Long) As  
Long
```

```
Private Declare Function FindWindow Lib "user32" Alias "FindWindowA" _  
(ByVal lpClassName As String, ByVal lpWindowName As String) As Long
```

```
Private Declare Function FindWindowEx Lib "user32" Alias "FindWindowExA" _  
(ByVal hwnd1 As Long, ByVal hwnd2 As Long, ByVal lpsz1 As String, _  
ByVal lpsz2 As String) As Long
```

Private Type COPYDATASTRUCT

dwData As Long

cbData As Long

lpData As Long

End Type

Private Const WM_COPYDATA = &H4A

Public Sub SetMusicInfo(Artist As String, Album As String, Title As String)

Dim Data As COPYDATASTRUCT

Dim sBuffer As String

Dim msn As Long

'Total length can not be longer then 256 characters!

sBuffer = " Music 1 {0} - {1} " & Trim(Artist) & " " & Title & " " & Album & " " & vbNullChar

Data.dwData = &H547

Data.lpData = StrPtr(sBuffer)

Data.cbData = LenB(sBuffer)

Do

msn = FindWindowEx(0&, msn, "MsnMsgrUIManager", vbNullString)

If (msn > 0) Then Call SendMessage(msn, WM_COPYDATA, 0, VarPtr(Data))

```
Loop Until (msn = 0)
End Sub
```

```
Sub Test()
SetMusicInfo "mimi", "Album", "leTitre"
End Sub
```

```
///
```

que j'ai tenté de convertir (j'arrivais déjà à récupérer le handle de msn):

```
stData est une structure
dwData est un entier
cbData est un entier
lpData est un entier
FIN
```

```
stMsnData est un stData
sBuffer est un Buffer
```

```
sBuffer = " Music 1 {0} - {1} " + sArtiste + " " + sTitre + " " + sAlbum + " "
stMsnData:dwData = cst_data
stMsnData:lpData = Val(sBuffer)
stMsnData:cbData = Taille(sBuffer)
```

```
BOUCLE
SendMessage(nHandleMsn,WM_COPYDATA,0,&stMsnData)
```

A FAIRE TANTQUE nHandleMsn <> 0

Pb : rien ne se passe.
ni meme de bug !

des pistes?
merci
