Hi Hawkman (Artec) ,

You are not the only one ...

From the last Windeveries (2002), interview with Mister Prut from PcSoft.

[WDA] When the 'real' ReadWrite ODBC driver for Hyperfile is coming?

[Pcsoft]You don't want that your clients are changing the data without control, (let say) from Excel ...

My comment on this statement you can read on the Parsimony WinDev Forum , somewhere in jan/feb 2003. (Beurk)

May 2003 I send the next email to PcSoft :

We are in the midst of selling our product to a reasonable 'big' prospect.
The prospect have also their own (small) softwaredivision (not using WinDev). This division is going to create Webservices and one of their demands is that they can access the hyperfile-database in a read and write (!!) manner.

Is their any chance that there is coming a possible write access driver (ODBC ...) for hyperfiles in the near future ? If so, can you give me a approximately date
----

As you can imagine the answer of PCSoft was negative.
(no plans for this in near or medium term future)
but maybe with their Hyperfile C/S ideas their narrowmindness will dissapear a little.

In the meantime, if someone got a solution I'm most interested.

Greetings,
Peter
